PROFESSIONAL SUMMARY

BCA candidate graduating in 2027 with hands-on experience developing Python/Flask web applications, REST APIs, database-backed workflows, and user authentication. Skilled in Java, Python, SQL/MySQL, debugging, and Git/GitHub. Familiar with software quality assurance and manual testing concepts, including functional test scenarios, test-case design, input validation, and defect identification. Seeking an entry-level Associate Quality Engineer role to support reliable software delivery while developing further expertise in test automation.

TECHNICAL SKILLS

Programming Languages: Java, Python, C
Software Testing: Manual testing concepts, functional testing, test-case design, positive/negative scenarios, input validation, defect identification, regression-testing fundamentals
Automation & Delivery: Selenium (learning), CI/CD and deployment pipeline concepts (learning)
Web Technologies: HTML, CSS, JavaScript, Bootstrap
Frameworks & Databases: Flask, SQL/MySQL, database design, database normalization
Core CS: Data Structures, Object-Oriented Programming, client-server architecture, authentication
Tools & Technologies: Git, GitHub, REST APIs, deployment
Problem Solving: Java/Python programming fundamentals and debugging

EXPERIENCE

Python Developer Intern | Codec Technologies 2-month internship

- Internship role focused on Python development and application logic.
- Built development experience relevant to debugging, validating expected behavior, and maintaining reliable application workflows.

Google Student Ambassador | Google 2026

- Participated in student-focused technology awareness and outreach activities.
- Supported technology content creation and student engagement, including communication about Google AI tools and student technology initiatives.

PROJECTS

EduGlow — Online Learning & Student Management Platform

- Built a student-focused web platform with user authentication, login, a student dashboard, and responsive navigation.
- Integrated backend APIs with a database to store and manage user data; relevant to validating authentication and data workflows.

SmartExam Toolkit — Online Examination System

- Developed a full-stack examination system supporting exam creation, submission, and result handling.
- Built REST API endpoints for users, exams, and responses; integrated input validation and structured data flow.

Real-Time Messaging Web Application — WhatsApp-Style

- Built an interactive chat interface with real-time communication features and responsive frontend layout.
- Worked on dynamic UI behavior and cross-screen layout considerations.

Online Ticketing System — Full Stack

- Developed a Flask-based ticket booking and management application with persistent database storage.
- Designed frontend workflows for ticket booking and tracking; supports end-to-end workflow validation scenarios.

EDUCATION

Bachelor of Computer Applications (BCA), Bareilly College, Bareilly | 2024–2027
Class XII, C Lal V Pal SVM Inter College, Pilibhit | 2022–2023

LANGUAGES

Hindi (Native) | English (Professional Working Proficiency)
