PROFESSIONAL SUMMARY

BCA student (graduating 2027) with skills in Python, Java, Flask, SQL, and web development. Built full-stack applications featuring REST APIs, database integration, and user authentication, with version control through Git and GitHub. Seeking Python developer, backend developer, or software engineering internships and entry-level roles to build reliable, database-driven applications.

TECHNICAL SKILLS

Programming Languages: C Language , Java, Python.
Web Development: HTML, CSS, JavaScript, Bootstrap.
Frameworks: Flask
Databases: SQL/MySQL, Database Design, Database Normalization
Core Computer Science: Data Structures, Object-Oriented Programming, Client-Server Architecture, Authentication Systems.
Tools & Technologies: Git, GitHub, REST APIs, Deployment.

EXPERIENCE

Python Developer Intern — 2-month internship

Codec Technologies

- Internship role focused on Python development.

Google Student Ambassador — *2026*

Google

- Took part in student-focused technology awareness and outreach activities.
- Supported technology-related content creation and student engagement.
- Helped communicate information about Google's AI tools and student technology initiatives.

PROJECTS

EduGlow – Online Learning & Student Management Platform

- Built a student-focused web platform for online learning and student management, with user authentication and login.
- Developed a student dashboard and a responsive user interface with structured navigation.
- Integrated backend APIs with a database to store and manage user data.

SmartExam Toolkit – Online Examination System

- Developed a full-stack online examination system supporting exam creation, submission, and result handling.
- Built a REST API backend to manage users, exams, and responses.
- Integrated frontend and backend with input validation and structured data flow.

Real-Time Messaging Web Application – WhatsApp-Style

- Built a WhatsApp-style messaging web application with an interactive chat interface.
- Implemented real-time communication features and a dynamic user interface.
- Designed a responsive frontend layout that adapts across screen sizes.

Online Ticketing System – Full Stack

- Developed a full-stack web application for ticket booking and management.
- Built the Flask backend and integrated a database for persistent data storage.
- Designed the frontend interface for the ticket booking and tracking workflow.

EDUCATION

Bachelor of Computer Applications (BCA), *Bareilly College, Bareilly* — *2024 – 2027*

Class XII, *C Lal V Pal SVM Inter College, Pilibhit* — *2022 – 2023*

LANGUAGES

Hindi (Native) | English (Professional Working Proficiency)
